PROFESSIONAL SUMMARY

Highly motivated and results-driven Full Stack Developer, AI Specialist, and Mobile Development Engineer with strong expertise in designing, developing, and deploying scalable software, web and mobile applications. Skilled in modern frameworks, API development, database management, and machine learning model integration to deliver innovative, user-centered solutions. Passionate about leveraging artificial intelligence and cross-platform mobile technologies to solve real-world problems and create impactful digital products

EDUCATION

Multimedia University of Kenya

Rongai, Kenya

Degree INFORMATION TECHNOLOGY

On Going

EXPERIENCE

Multimedia University

Nairobi, Kenya

University's Work Study Program

2023 to date

The work study program was provided by the University under the direction of the Dean of students.

Through the act of teamwork, discipline and dedicated hard work, I was extremely exposed to thrilling experiences and I got my base foundation in Coding, Web design and software development sectors.

speqlink Organisation

Nairobi, Kenya

Lead Software Engineer

June 2024– Present

Led the end-to-end development of the speqlink web platform, delivering a scalable full-stack solution from concept to deployment. Managed system architecture, database design, APIs, and performance optimization while translating business requirements into high-quality technical solutions. Provided technical leadership, driving continuous improvement, scalability, and long-term platform sustainability.

Ayot Health Solutions

Migori, Kenya

Software Developer

June 2024 – October 2024

Currently contributing to the development and enhancement of healthcare technology solutions, building and maintaining scalable web and system applications. Collaborate with cross-functional teams to design, implement, and optimize software features that improve system performance, data management, and user experience. Apply full-stack development skills and best practices to deliver secure, efficient, and reliable digital health solutions.

Huduma Centre Kenya

Migori, Kenya

ICT & Service Support Attachment

June 2025 – August 2025

Gained hands-on technical and administrative experience across multiple departments, including ICT support, Births & Deaths registration, and the National Construction Authority (NCA) desk.

Provided frontline digital support, assisted with data entry and system updates, helped troubleshoot computer and network-related issues, and supported service delivery operations.

This role strengthened my skills in customer service, government digital systems, ICT operations, and document processing.

Skills

AI: TensorFlow, CNN Models, LangChain, LangGraph, Azure OpenAI

Frontend Development: NextJs, React JS, HTML, CSS, Java Script

Backend Development: FastAPI, Django, Express JS
UI: Figma, Canva.
Database: PostgreSQL, MongoDB, MySQL
Programming Languages: Python, Java Script, Java, C++, C#

ACHIEVEMENTS: Certificates and budes

1. HTML,CSS Basics - <https://www.sololearn.com/certificates/CC-DP7VSLB4> |SOLOLEARN
 2. Introduction to Python - <https://www.sololearn.com/certificates/CC-BME39LYN> |SOLOLEARN
 3. MLFoundations - https://www.credly.com/badges/8180cb89-f07a-4901-bf22-d42ff978ec1c/public_url |AMAZON
 4. Computer hardware basics - https://www.credly.com/badges/e02be975-e3cb-4944-8075-480bbfe79df6/public_url |CISCO
 5. AI Agents - https://www.credly.com/badges/edf431be-3f22-4cfb-a4ab-f97b440ea357/public_url |MICROSOFT
 6. Introduction to cybersecurity - https://www.credly.com/badges/64d77c47-313f-42d5-bbf6-7bfba8525afb/public_url |CISCO
 7. AWS Generative AI & ML - www.udacity.com/certificate/e/fcb43cca-5000-11f0-b4f9-6f86a84deecc |UDACITY / AWS
 8. Yeastar Certified Technician - https://ppfile-s3.yeastar.com/ppv3-resource/certificate/YSCT-PSE_CT37251110467_926.png

PROJECTS

Verified client projects : [KCAA SRBS](#) | [Octabell](#) | [Anira Insurance Agency](#) | [Ayot Health Solutions](#)

- **NestLink Organization – IT Company Website:** [speglink](#)

Developed a fully functional, modern, and responsive website for NestLink Organization, an IT solutions company.

The project involved designing and building the entire platform from scratch using Next JS, Tailwind CSS, and JavaScript, ensuring a smooth user experience and professional UI/UX.

Implemented multiple pages including services, portfolio, contact forms, and company information, along with optimized performance, mobile responsiveness, and clean component-based architecture.

This project strengthened my skills in full-stack web development, UI/UX design, and building production-ready business websites.

- **Ai-Driven Crop detection and prevention system:** <https://ai-crop-guard.vercel.app/>

I Developed an AI-driven crop disease detection and prevention system utilizing Python, machine learning, and computer vision to enable early identification and management of crop diseases, as well as React and JavaScript for the front end, thereby enhancing agricultural productivity and sustainability.

- **Ai Powered Dermatology Assistant:** <https://purple-river-00fd8ef0f.6.azurestaticapps.net/>

With a team of three, we developed an Ai powered Dermatology assistant, a software capable of diagnosing and giving immediate and effective recommendations to the user. This was achieved by leveraging Azure AI models and Api(s), Microsoft Fabrics and integrating AI agents. Tech stack include, React JS, Tailwind CSS, ML, DL, and Django.

Networking & Security: <https://my-portfolio-omega-ruby-16.vercel.app/#projects>

- **Network Setup & Configuration:** Configured a small network with multiple devices (routers, switches, computers) using tools like Wireshark for packet analysis and troubleshooting. I obtained the skills on CISCO Networking Course
- **Basic Cybersecurity Project:** Developed a simple intrusion detection system (IDS) or implemented basic security measures on a virtual machine.

Data Analysis & Visualization: <https://my-portfolio-omega-ruby-16.vercel.app/#projects>

- **Data Analysis Project:** Analyzed a dataset (e.g., public data, personal data) using Python (with libraries like Pandas, NumPy, and Matplotlib/Seaborn) to extract insights and create visualizations like charts and graphs.
- **Machine Learning Model:** Developed a simple machine learning model (e.g., for image classification, sentiment analysis) using Python libraries like scikit-learn or TensorFlow.
